Implantology

Level:

All

Modality:

Face-to-face

Time:

From 9:30 to 19:00 h

Price:

550 €

Includes two hotel nights, one dinner, one lunch, coffee and book "Short and extra short implants"

Account number:

ES63 0030 3482 46 0000784271

Indicating name and surname of the registered person.

Place:

Eduardo Anitua Institute
Calle Jacinto Quincoces 39
01007 Vitoria-Gasteiz

Monographic course on short implants

29th NOVEMBER 2024

The atrophic maxilla is still a common challenge in dental clinics. Although there are different approaches to rehabilitate these patients, the development and improvements in short implants have made it possible to solve complex cases in a simpler way, with less morbidity and risks for the patient. But above all, one of the great advantages of the use of short implants is their high predictability.

This course focuses on showing the indications, remembering the key aspects in the planning, and describing step by step the technique of placing short implants. During the course we will review the indications for immediate loading and show you several real cases solved, from which important conclusions can be drawn.
